

Outsmart any cyber threat in any terrain

The threat: AI-fueled cyber attacks and sprawling attack surfaces in a constantly evolving landscape.

The current solution: Static training, untested tools, and unvalidated processes.

The result: No confidence, preparedness, or proof of ROI.

Enter, SimSpace.

SimSpace empowers cybersecurity teams with the most realistic, intelligent cyber range to train people, test technology, and validate processes. With AI-powered insights and high-fidelity environments, organizations continuously improve cyber readiness as teams build adaptive, resilient defenses and processes—before attackers strike.

SimSpace Success by the Numbers

200%
more attack vectors
identified by better
configuring your security
tech.

50%
reduction in false positives
within one quarter.

300+
hours/month of duplicated
engineering effort
eliminated.

60%
of preventable breaches
avoided due to tool
misconfiguration.

Why SimSpace?

Simulate

Model your attack surface, run live-fire exercises, and test your technologies.

Outperform

Improve cyber operations while reducing costs.

Outsmart

Preempt adversaries with adaptive competencies.

What You Can Do With SimSpace.

Train

- ▶ Individual and team training for defenders across a variety of security teams
- ▶ Live-fire experiences in replica production environments
- ▶ Role-based content with scoring and assessments
- ▶ Ideal for upskilling, onboarding, and proving readiness

Test

- ▶ Validate and tune your entire tech stack, including EDR, SIEM, SOAR, and AI tools
- ▶ Perform bakeoffs, side-by-sides, and optimization tests
- ▶ Measure detection, latency, and false positives in context
- ▶ Ideal for tech evaluation, stack tuning, and R&D

Validate

- ▶ Test playbooks and cross-functional crisis response
- ▶ Validate security controls and backup workflows
- ▶ Generate audit-ready reporting for regulators or execs
- ▶ Ideal for risk officers, GRC teams, and crisis leaders

The Results.

Cyber defense to outsmart any threat.

Accelerate Cyber Readiness & Resilience

Prepare teams, processes, and technologies to outsmart adversaries before the fight begins.

Optimize Any Tool Against Any Threat in Any Terrain

Graduate from individual to team training, testing tools & threat intelligence, and validating controls & processes.

Consolidate Cyber Spend

Rationalize cybersecurity investments without compromising security posture.

Test Your Readiness & Resilience.

Schedule a realistic simulation tailored to your organization's environment.
